

Question No.	Photo Description	Intro and questions
1	L adrenal mass CT	young female HT, differential and investigations
2	Recurrent malignant melanoma after resection of primary	Prognostic factors for primary, management options now
3	Small bowel through abdo wall injury	10 yo boy bike accident management
4	ingrown toenail	16 yo boy, treatment, surgical options and advice
5	pancreatic pseudocyst CT	recent ETOH pancreatitis now septic, describe CT and management
6	oesophagogastrrectomy with Barrett's and cancer	Describe specimen, incidence and aetiology
7	Chest wall recurrence breast ca and lymphoedema	5 yrs post mastectomy, Describe appearance and management options
8	RIF phlegmon/abscess CT	50 female, likely causes and management options
9	old man mass at angle of mandible	60 yo, present 2 years, likely diagnosis, how to confirm and treat, complications of surgery
10	right colon cancer and polyp	34 year old woman, describe specimen, what to look for on pathology and other organs to examine
11	Scrotal swelling right side	Differential, clinical features to differentiate, investigations to confirm
12	seat belt bruising post MVA	Significance, associated injuries, CT findings you would look for
13	Opened gallbladder with stones ?was there a GB polyp	Describe specimen, aetiology and complications
14	Liver segments	number them from diagram and explain how divided into segmental anatomy
15	MRCP with stone in CBD	describe image, how to image biliary tree non operatively, advantages of MRCP over CT cholangiogram, contraindications to MRI x4
16	perianal abscess	diagnosis, aetiology, treatment, also how would you consent
17	Melanosis Coli, colonoscopy photo	diagnosis, aetiology, treatment
18	Post surgery colitis (?pseudomembranous)	diagnosis, pathophysiology, how to confirm diagnosis
19	tumor attached to the small bowel, antimesenteric side	?GIST/carcinoid, diagnosis, presentation, pathology for prognosis
20	Meckel's diverticulum	band divided for SBO in 67 yo male- how does it occur, would you resect and why/why not
21	Gastric antral ulcer/malignancy	diagnosis, incidence increasing/decreasing, investigations prior to surgery
22	Intussusception SB 50 yo man	diagnosis, aetiology, surgical management at operation
23	Infected diabetic foot with xray with gas in tissues	What do you see, management
24	CT abdo liver mets dilated panc duct ? Panc cancer	diagnosis, palliative options
25	MNG	pathological complications, 5 complications of resection
