

General Notes: easy to run out of time. If have no idea what's going on try and correlate history provided with the image or even nature of questions (last resort). Need to do dot points, practice this before hand.

Apr-05

Image and format	Picture diagnosis	Stem Questions (3 questions on each image)
Contrast meal of oesophagus	Achalasia	What is seen, what is the aetiology, ?
Young woman with a laparotomy image of her small intestine, inflamed with fibrin present	?Crohn's disease	What is the diagnosis, what are the histology findings,?
Pigmented lesion on sole of foot	Acral melanoma	Diagnosis, what determines the prognosis, further management
Ulcer over dorsum of toe, interphalangeal joint. Patient looks to have had a great toe amputation.	Pressure/ischaemic ulcer ?PVD	What do you see, causes?
CT of a pelvic abscess	Diverticular abscess	Diagnosis, Differential diagnosis, Management options
CT of abdomen, patient post subtotal gastrectomy, fever, unwell	L Subphrenic abscess.	Diagnosis, Investigations, Management
Photo breast, young woman post partum, asymptomatic breast cyst aspirated -milk	Galactocoele	Treatment, Indications for biopsy, how you manage
Photo young male with L breast enlargement	Gynaecomastia	Diagnosis, causes, management
Photo elderly woman with fungating breast/chest wall mass	Advanced breast cancer	What do you see diagnosis, investigations, management
Photo of man with arms above head, the arms down	Pemberton's sign	Most likely cause, investigation, treatment
Photo lady with a swollen anterior thigh	Sarcoma of thigh	Diagnosis, Investigations, Management
CT scan abdo, mass in region of L adrenal, young hypertensive patient	Phaeochromocytoma	Diagnosis, other tests, ?
Photo Fijian lady 43yo with a L swollen leg 5 years duration	Lymphoedema of L leg	Diagnosis, Investigations, Management
Operative photo of a neck operation 2 incision R side	Branchial fistula excision	Condition, aetiology, complications
Angiogram of SMA with filling defect	SMA embolism	Diagnosis, initial treatment, management
ERCP with Dormia basket in place		What is it an xray of, what are the risks of the procedure, how can you prevent complications preoperatively
Photo of lady with prolapse	Rectal prolapse	Diagnosis and what 2 pieces of further information would you like, investigations and operative option
Photo 2 legs one pale. Hx Young male Day 1 post repair of fractured tibia and fibula	Compartment syndrome L leg	Diagnosis,?, Treatment
Angiogram of coeliac axis	?Accessory hepatic artery of the L gastric	What is the abnormality, what operations does this condition affect, how often does it occur
Specimen photo of colon showing multiple polyps	FAP	What is the genetic defect and other manifestations, screening of family members, what operation for the patient
Photo of perineum showing gangrenous areas	Fournier's gangrene	Diagnosis, causes, management
